

Steel Stainless Soap Dispensers Multifeed System

BC 1900-MA / BC 1900-MB Dolphin Multifeed Soap Dispenser

- Supplies up to 4 dispensers simultaneously
- Easy to install with WP Soap Dispenser range
- High quality PVC clear tubing
- Nylon manifold ensures tubing will not kink in the bottle
- Easy to clean HDPE container
- PLEASE NOTE we recommend a maximum of 2m long soap delivery tubes and installers

should keep lengths as short as possible to assist dispenser longevity; the longer the tubes the greater the vacuum required to draw the soap and greater the wear on the pump.

- We do have bespoke solutions for delivering soap over greater distances; please contact our technical team on 01424 202224 for assistance
